

Gatekeeper Courses by Program: Ensuring Success and Equity for All

Vinh Nguyen <vnguyen216@ivc.edu>
Loris Fagioli <lfagioli@ivc.edu>
Rebecca Kaminsky <rkaminsky@ivc.edu>

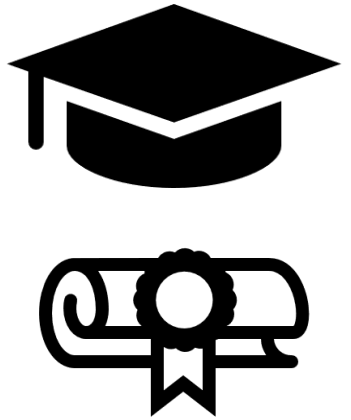

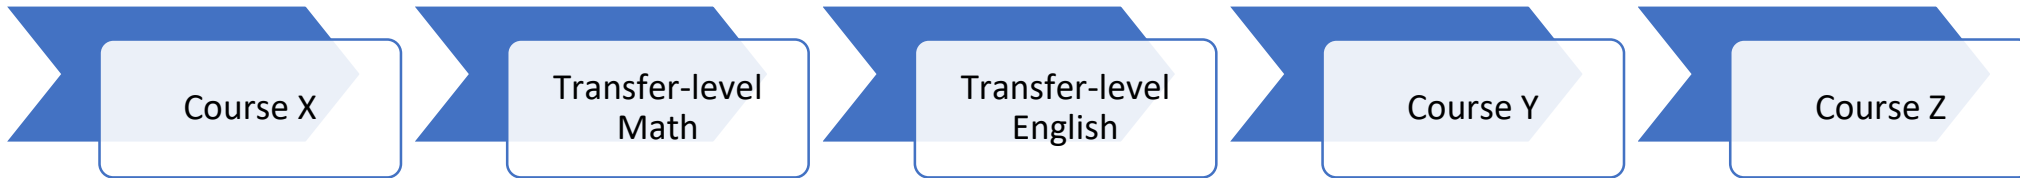

Poll

What is your role at
your institution?

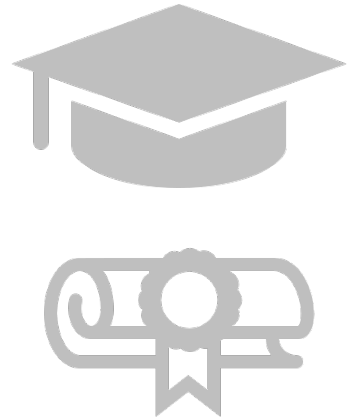

Completion of Program of Study

Degree / Transfer Students

Completion of Program of Study

Degree / Transfer Students

Historically: many students could not complete their program of study because they could not get through **transfer-level math** and/or **English** (inequitable placement practices, remediation, etc)

Overall Throughput Rates

Students

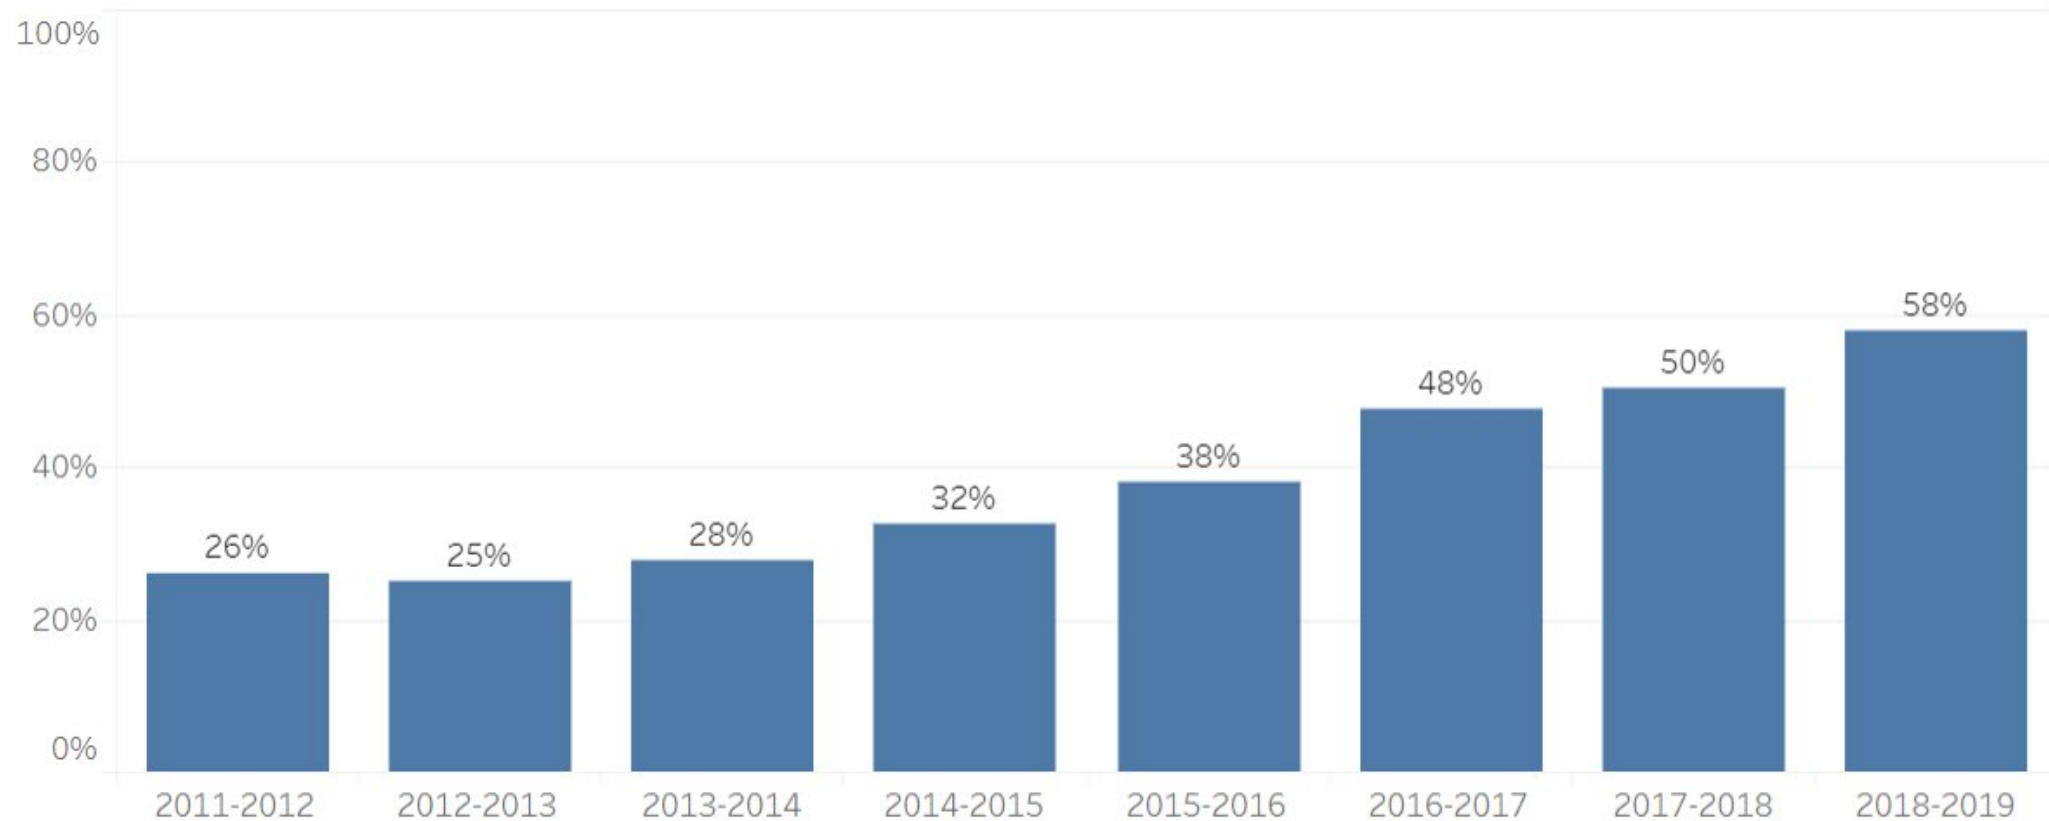

All Matriculants

Subject

Eng

Time Window

1-year from 1st Term

Changes: Acceleration, Placement Practices, and AB 705

Goal

Replicate gains of AB 705 for courses in other departments.

Question

Are there any gatekeeper courses in your program/department?

Definition

A gatekeeper course is one in which many students struggle to complete, and, as a result, prevents them from completing a program of study.

Identifying Potential Gatekeeper Courses

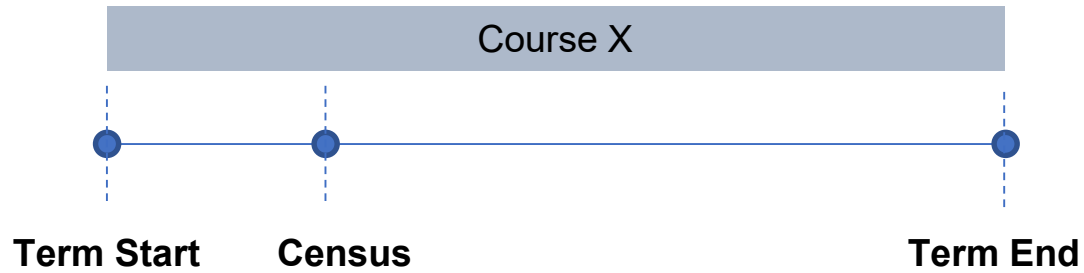

Poll

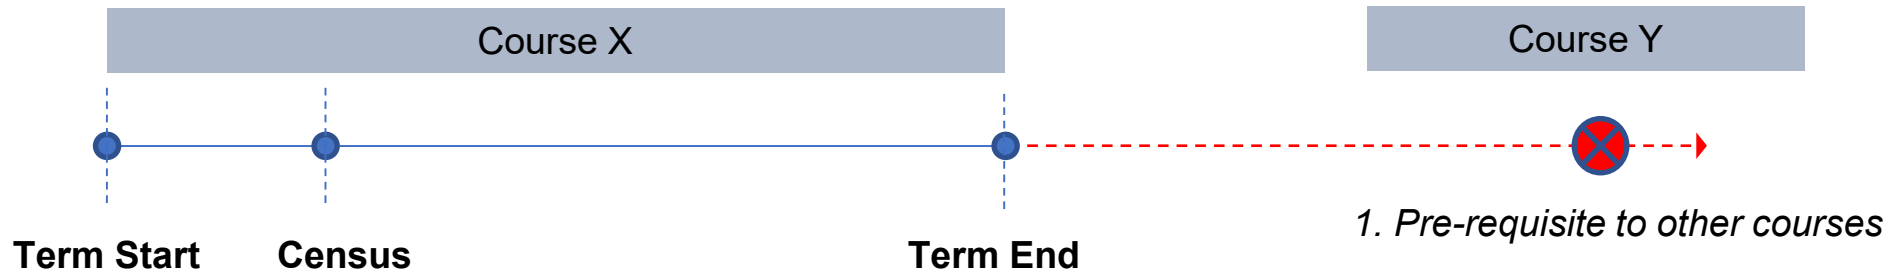

What metrics or outcomes would you look at to identify potential gatekeeper courses?

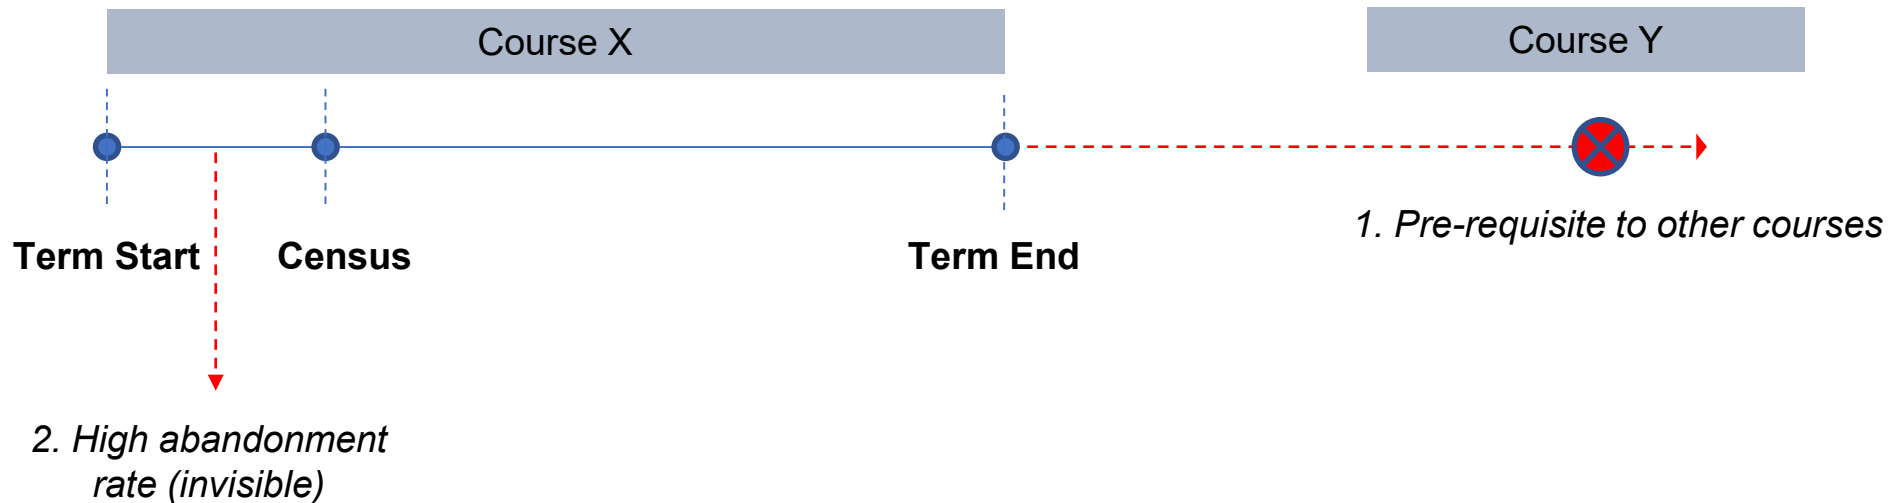

Brainstorm: How can a course prevent program completion?

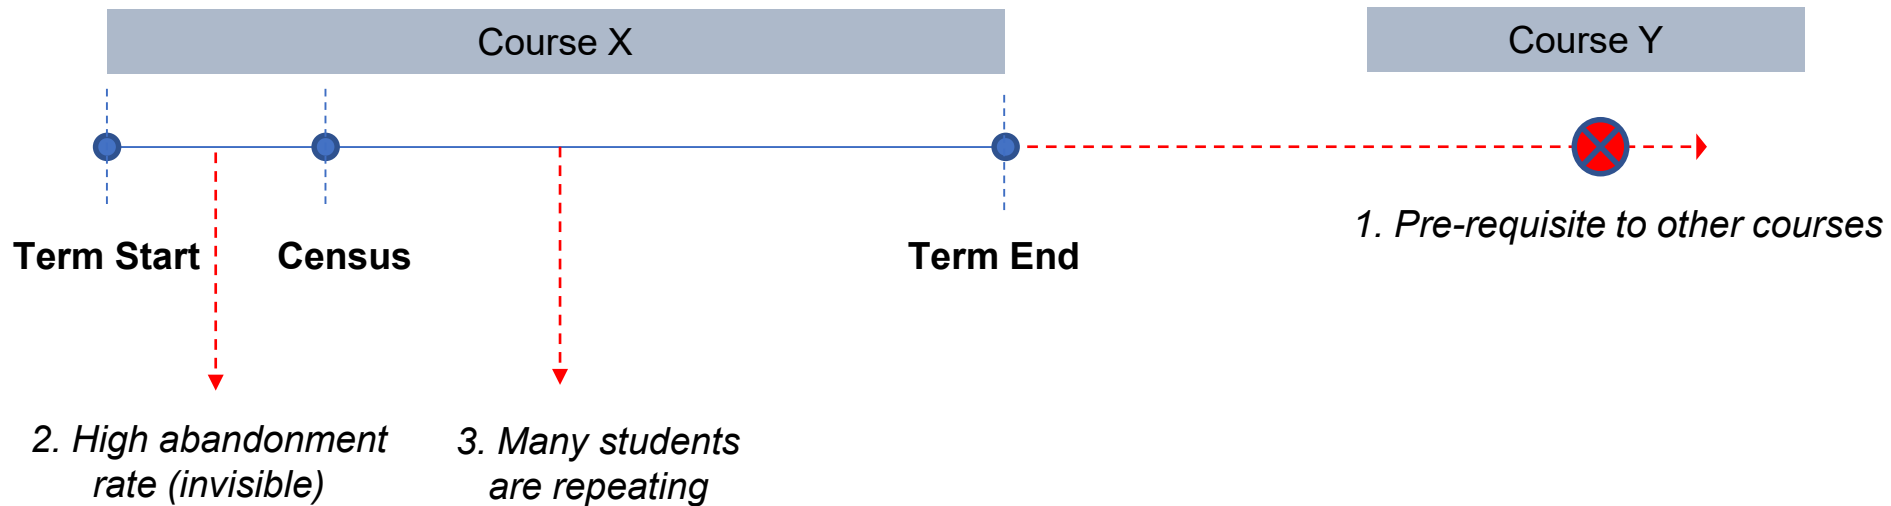

Brainstorm: How can a course prevent program completion?

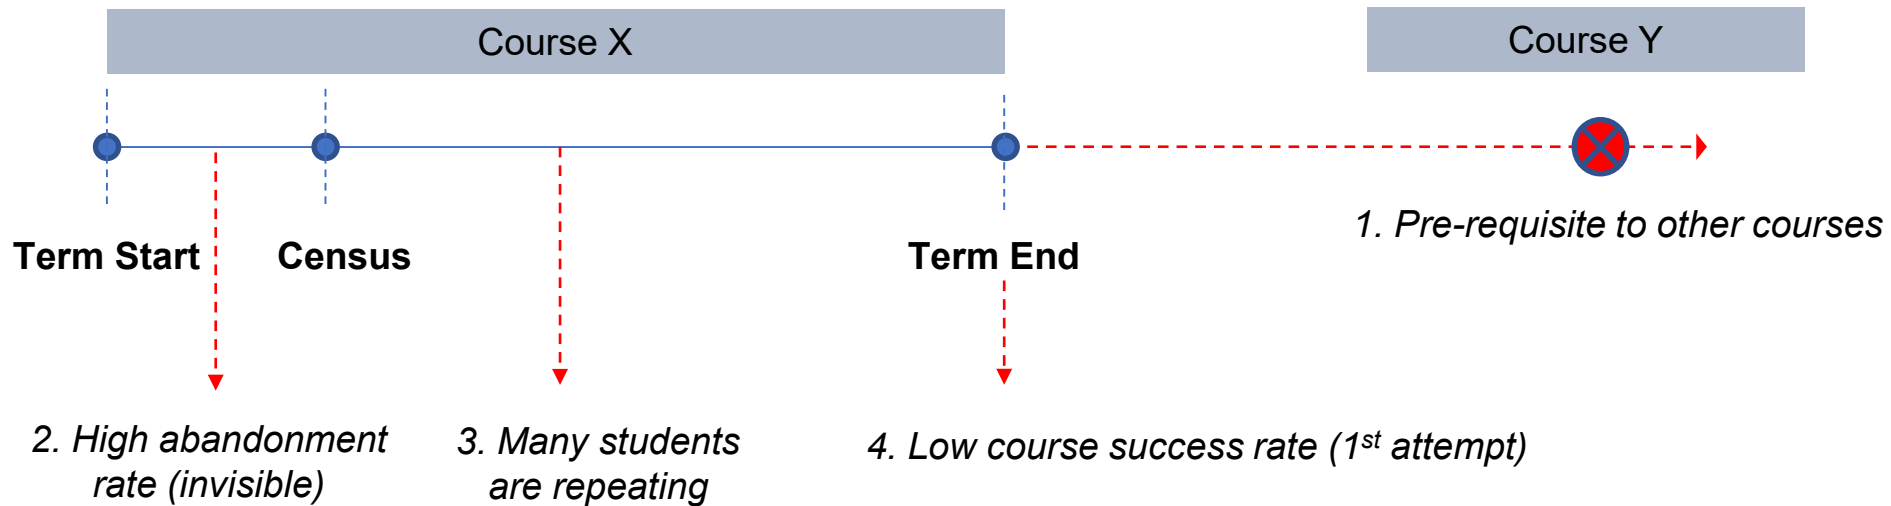

Brainstorm: How can a course prevent program completion?

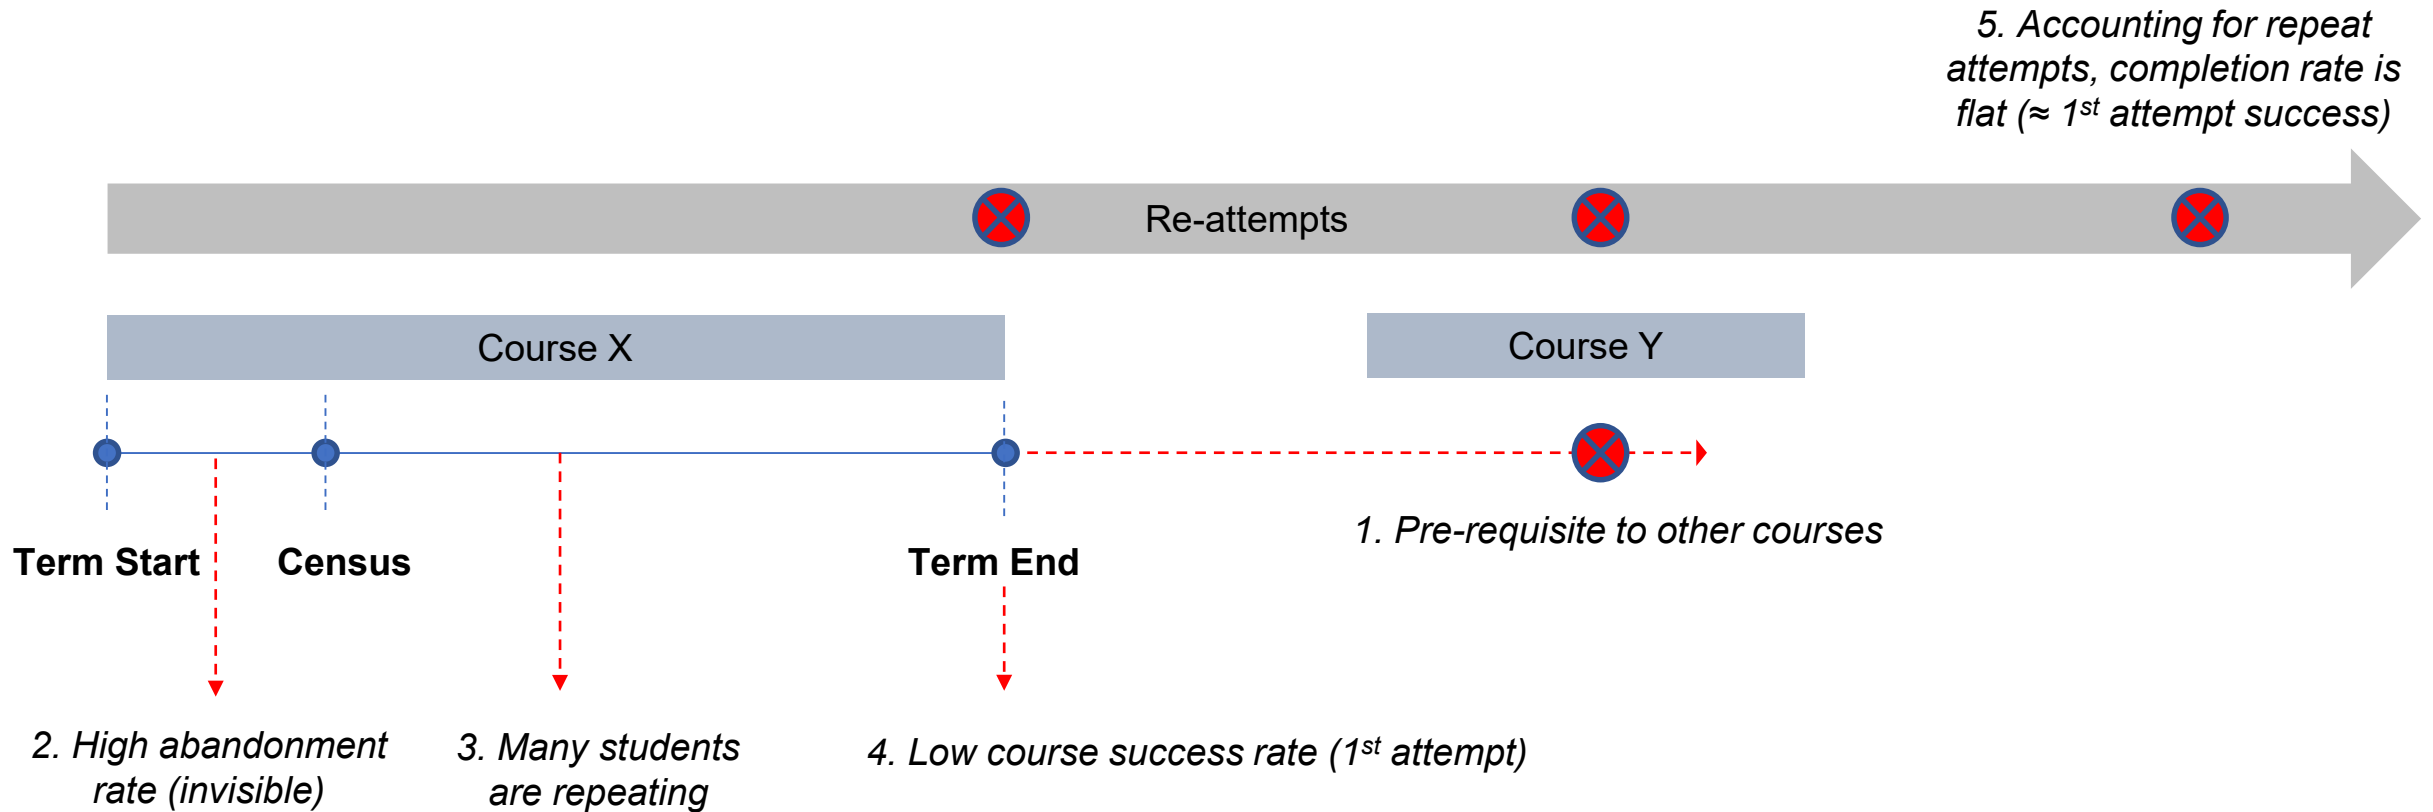

Brainstorm: How can a course prevent program completion?

How do we identify gatekeeper courses?

- Institutional researchers: expertise in data, but not in curriculum or specific disciplines
 - Rely on discipline expert: department chairs and faculty
 - Data exploration / reflection activity (PD week, department meetings)
 1. Reflection: *a priori* hypotheses on gatekeeper courses within department; reasonable thresholds for metrics of interest.
 2. Review metrics for each course offered by department: highlight courses with “extreme” values.
 3. Inquiry: aha’s? Why? What could be done?
 4. Immediate action steps
- 

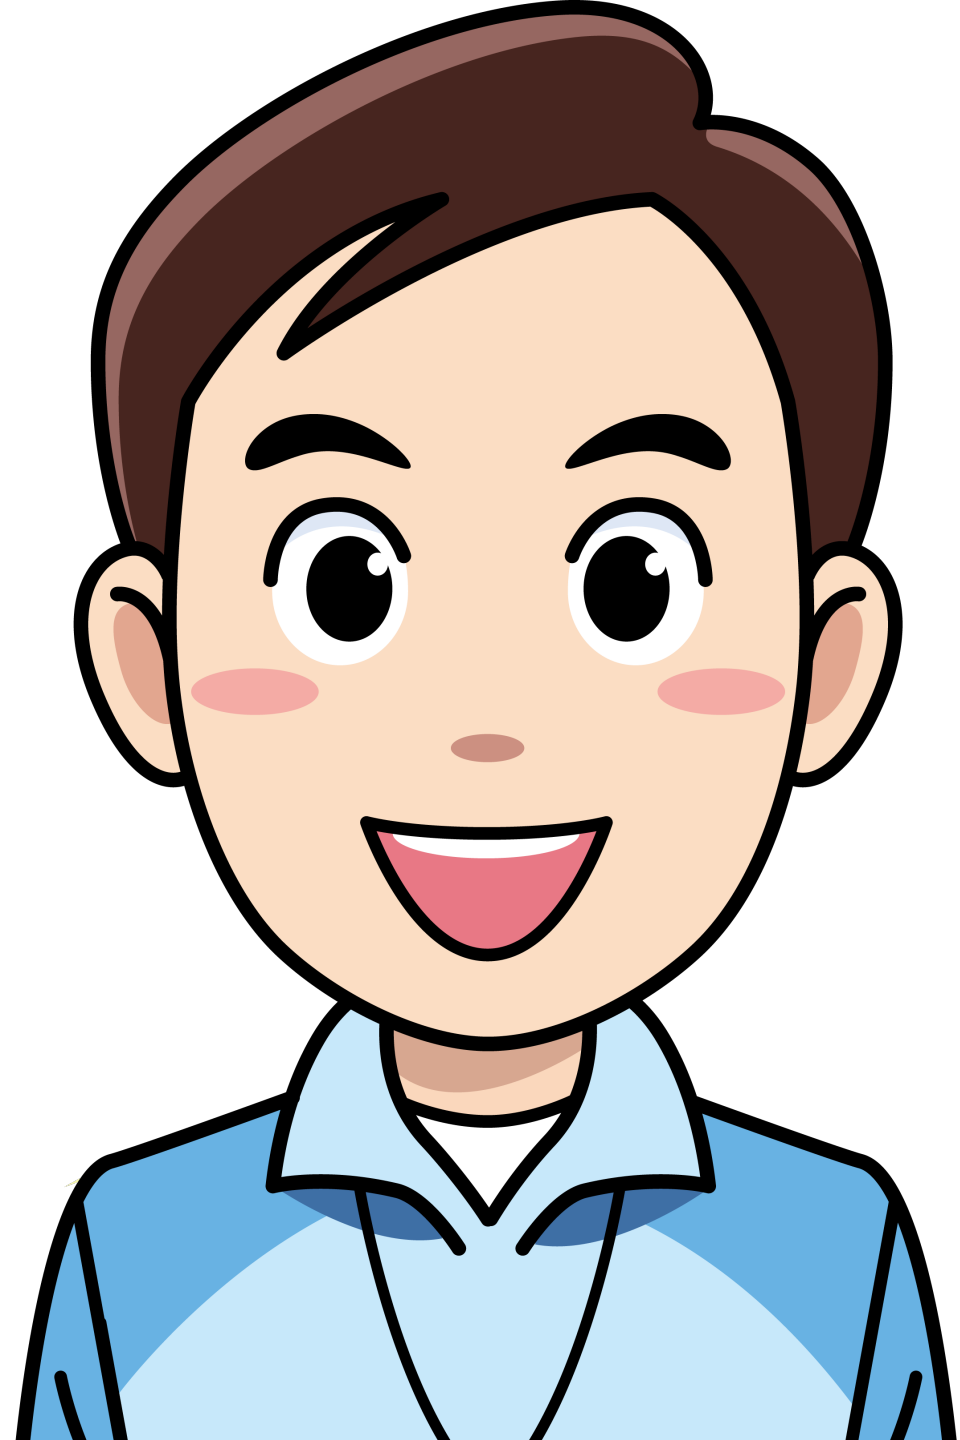

Poll

What abandon rate (0-100%) or above would concern you?

Abandon rate = rate at which students drop a course between the start of class and census, without re-enrolling in a different section of the same course.

Case Study: Psychology Department

- A'priori hypotheses:
 - PSYC 10 (statistics): required, highly quantitative
 - PSYC 2 (research methods): capstone course
 - Low success rates
- Concern thresholds:
 - Abandon rate: 10%
 - Repeater rate: 35%
 - 1st Attempt Success rate: 70%

List By: Course Prefix Selection: PSYC Abandon Rate >=: 10% Repeater Rate in Class >=: 0.35 1st Attempt Success <=: 70% Change in Throughput and 1st Attempt Success <=: 2% Range in Section 1st Attempt Success Rate >=: 20%

Observation 4

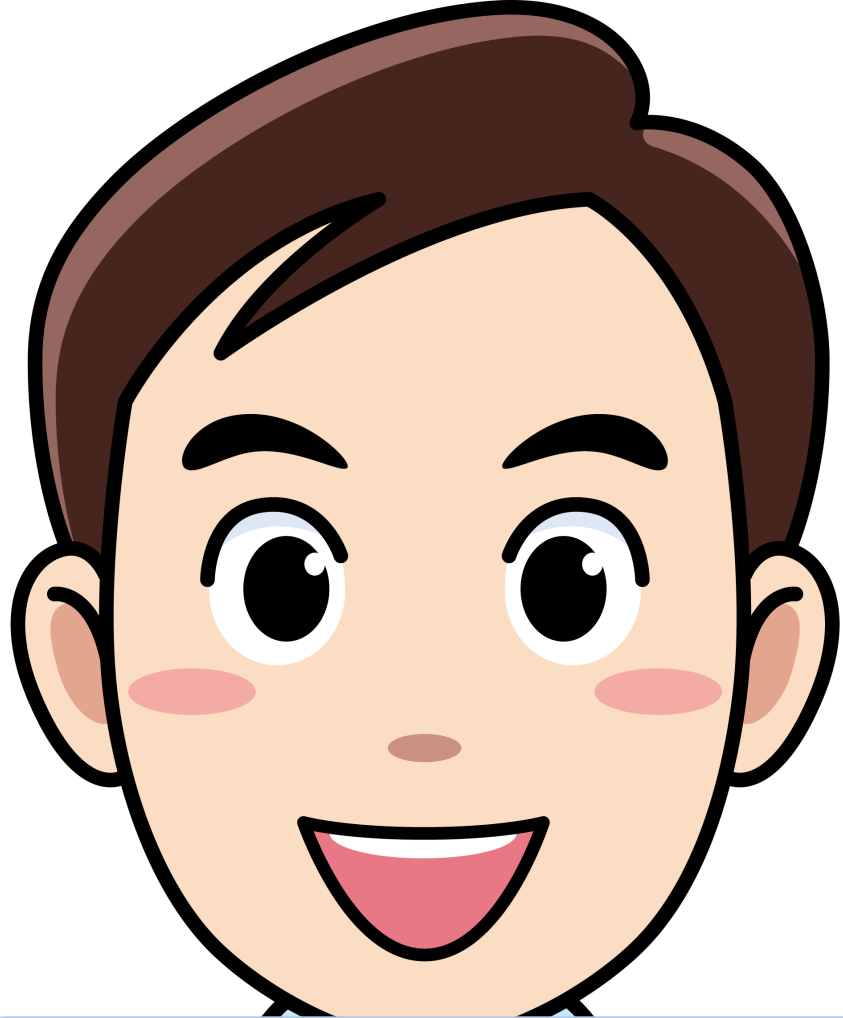

PSYC 9 (Cognition): low success, not serving Hispanic students well.

Case Study: Psychology Department

1. That many students abandon prior to census?!?!?
2. Students are doing very well in PSYC 2 and 10! Not a concern...
3. PSYC 5 (Human Sexuality): very popular class, but has high abandonment, low success, and wide range in success.
4. PSYC 9 (Cognition): low success, not serving Hispanic students well.

Next Steps

1. Investigate outlier sections for PSYC 5.
2. Bring up findings at department meeting to brainstorm ways to fine-tune courses.

Case Study: Psychology Department

1. That many students abandon prior to census?!?!?
2. Students are doing very well in PSYC 2 and 10! Not a concern...
3. PSYC 5 (Human Sexuality): very popular class, but has high abandonment, low success, and wide range in success.
4. PSYC 9 (Cognition): low success, not serving Hispanic students well.

Discussion

- What have you done to try to identify gatekeeper courses at your institution?
- Do you have suggestions on how to increase adoption of such a tool?
- After the “identification” step, what do you think might be effective at increasing completions in these gatekeeper courses?

A large orange circle is positioned on the left side of the slide, partially cut off by the edge.

Thank you!
