

Setup to run exercise during webinar (optional)

1. Install DisImpact in R:

```
install.packages('DisImpact', repos='https://cran.r-project.org')
```

More detailed setup instructions: <https://bit.ly/scaling-DI-setup>

2. Workshop files: <https://bit.ly/scaling-DI-workshop>

Download, unzip, and open “1 - Calc DI and Export.R”

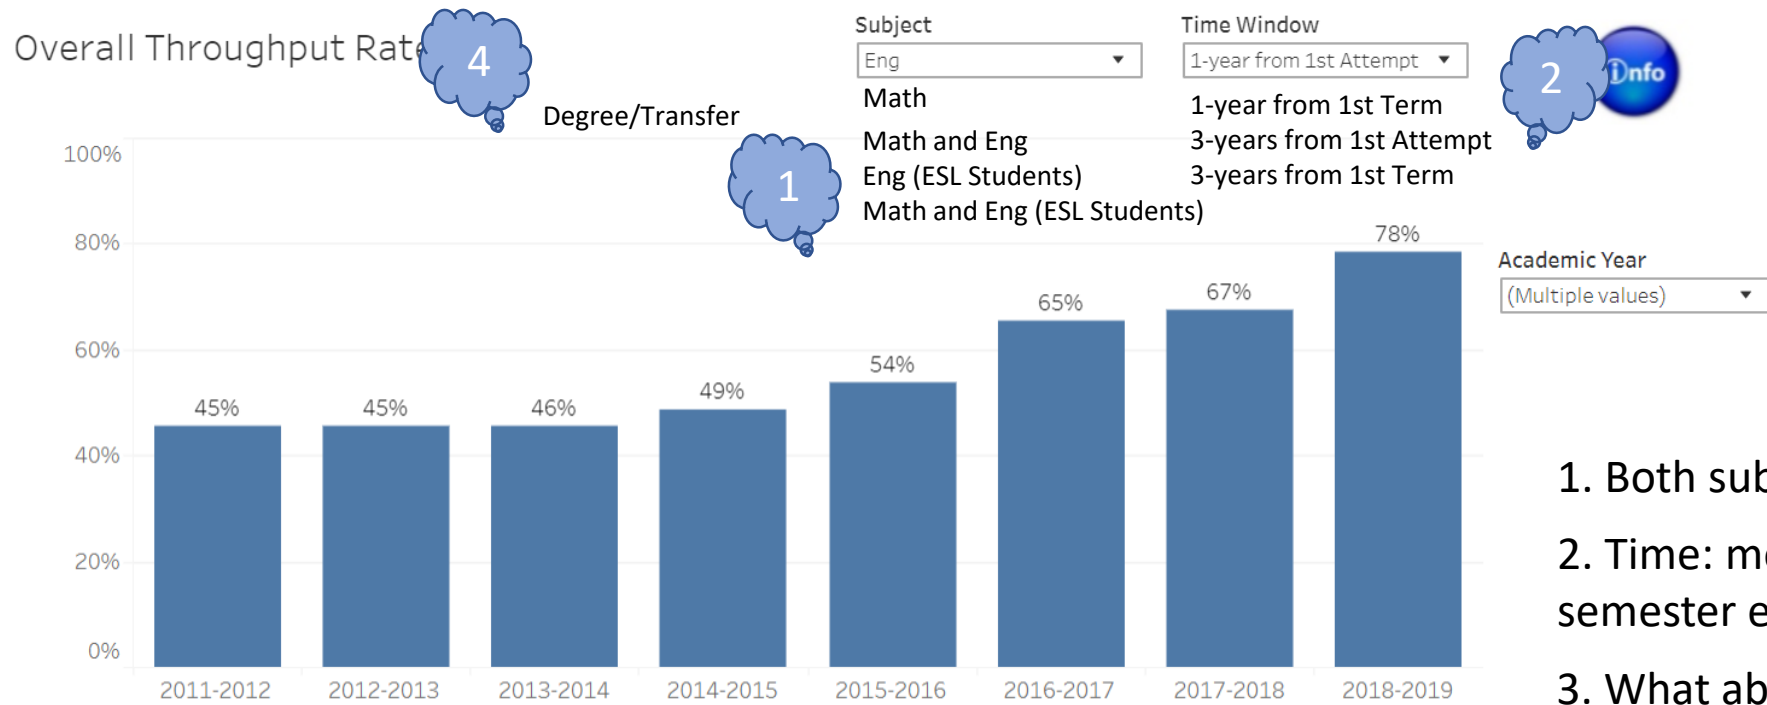

Focus on Equity: Scaling DI Calculations for Rapid Dashboard Development

Initial goal: *track English and math completions and disaggregate by ethnicity*

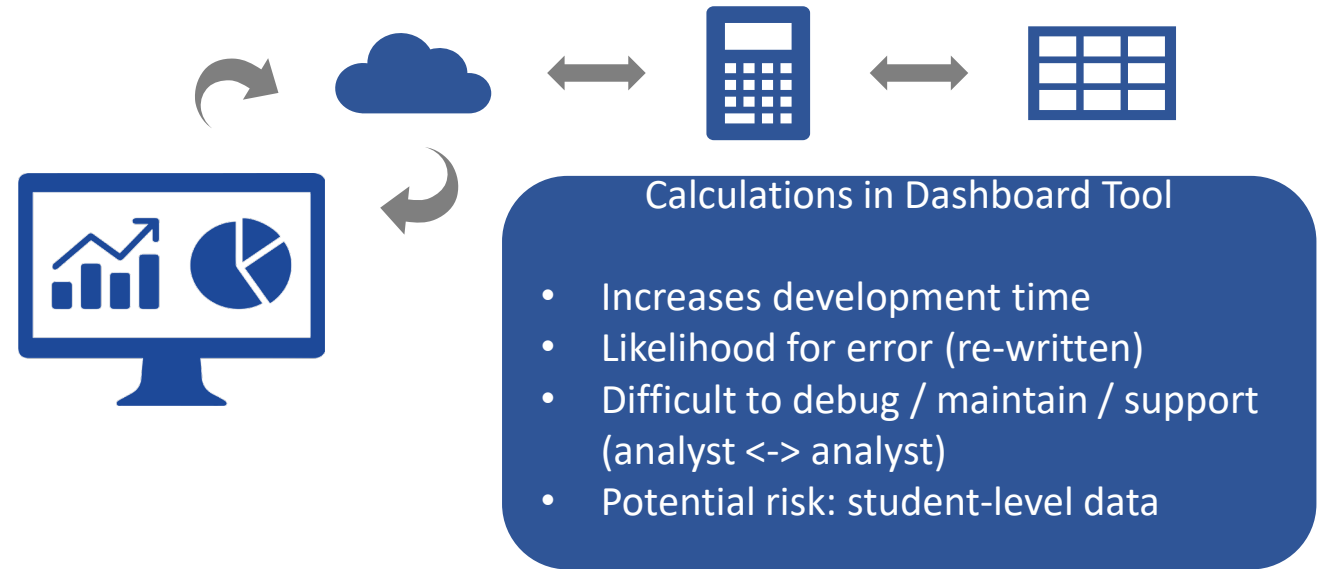

1. Both subjects? What about ESL students?
2. Time: measure from 1st attempt (AB 705) vs. 1st semester enrolled (Guided Pathways)
3. What about other disaggregation?
4. AB 705 is for degree/transfer students...
5. Equity gap exist: group X tends to be part time students.
6. Different DI methods / reference groups?

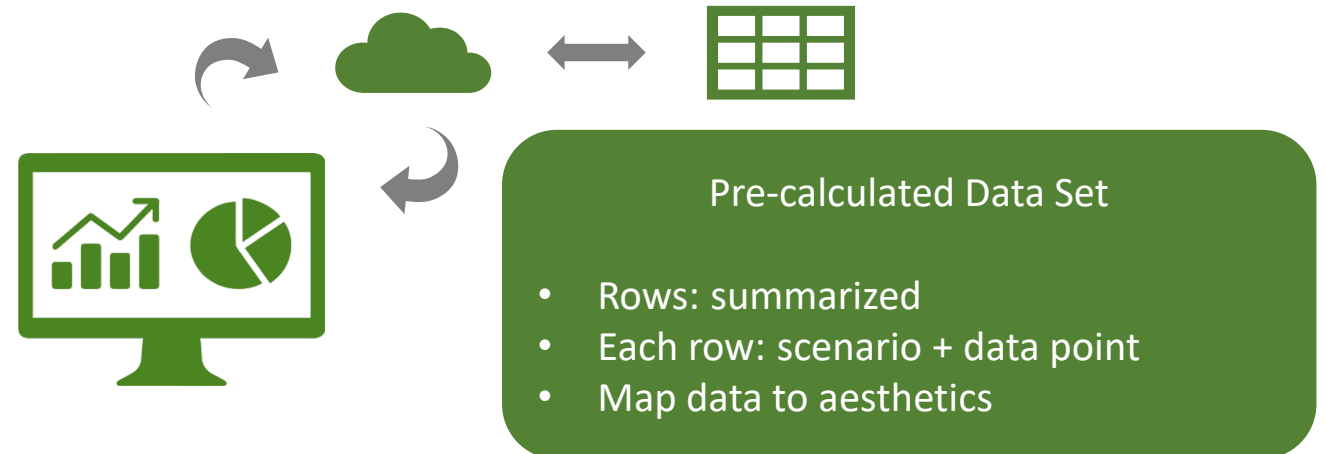

“Death by 1,000 filters...”
(a lot of work)

Development Approaches

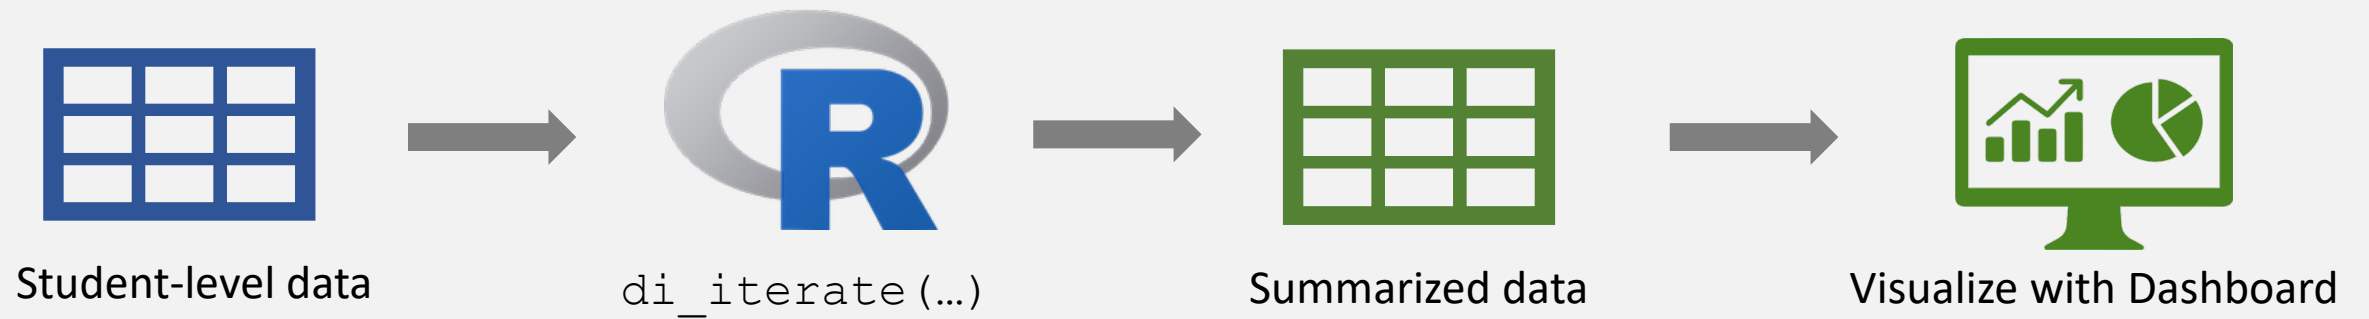

1. On-the-fly: filtering / disaggregation / calculations

2. Pre-calculations: rows as data points

Demo: DisImpact

1 - Calc DI and Export.R

- Import student level data set: `student_equity` (provided by DisImpact)
- `di_iterate(...)`
- Export summarized data set: `di_summary.csv` and `di_summary.xlsx`

2 - Dashboard - `di_summary.xlsx`

- Emulate dashboard filtering to show data and visualization

Additional Demonstrations

3 – Additional Examples.R

- PPG minus 1
- PPG: custom reference groups
- PI: threshold for DI
- 80% rule: threshold for DI
- 80% rule: custom reference groups
- Multiple PPG or DI parameter scenarios
- FERPA Block/Suppression

Sample Dashboards with Disaggregation

-
- Throughput [Dashboard](#): monitoring the impact of AB 705
 - Program Review [Dashboard](#): how are individual programs doing?
 - Others:
 - Grades by course
 - Grades by instructor
 - Statewide: success at different colleges

Thank you!
